re_BOOTCMP Tasmania Pilot Program

A GUIDE FOR STUDENTS

FLIPPING THE SCRIPT ON HACKING

AFP

JPC3
JOINT POLICING CYBERCRIME COORDINATION CENTRE

Program Summary

re_BOOTCMP is a cybercrime prevention program run by the AFP-led Joint Policing Cybercrime Coordination Centre (JPC3), in collaboration with Australian education providers, State & Territory Police and industry partners.

It caters to high school students, focusing on those who display a strong interest and aptitude in IT and may exhibit a curiosity towards exploring or crossing some online boundaries.

The one-day program, with follow up mentor/mentee engagement, aims to nurture and guide the talents of young, tech-savvy individuals towards positive and constructive use of their digital skills by teaching them the legal online boundaries and exciting career pathways for their skillsets.

The parallel half-day session for parents, carers, and teachers involves discussions from education and industry presenters about the ethical use of the internet and how to proactively support their child/student's passion for IT.

The Australian adaptation of re_BOOTCMP follows the success of the project by the Dutch National Police. It was piloted in Tasmania in June 2025 at TasTAFE Hobart, in close partnership with Tasmania Police, the Tasmanian Department of Premier and Cabinet and TasTAFE.

The program hosted 30 students from across the state, and a range of awesome volunteer mentors from across law enforcement, education and the cyber industry.

After the success of re_BOOTCMP Hobart 2025, we're gearing up to make 2026 even bigger and better. Want to be the first to hear what's coming? Scan the QR code below to stay in the loop.
